

# HOUE // Treatment instructions

## **BAMBOO**

The bamboo lamellas on your table are treated with a special impregnation from the factory, which is drawn into the bamboo. To keep the table nice, it is necessary to treat the bamboo lamellas on a regularly base with oil suitable for bamboo. We recommend you to oil the table before taking it into use, and again after approx. 4 weeks, then as needed (3 – 4 times a year)

Fungi can attack all wooden furniture that is placed outside. Once fungi have attacked the bamboo it will be possible to clean it by grounding the bamboo down with sand paper and oil it again.

It is very important that you do not oil the bamboo if there is the slightest sign of infestation of fungi. Oiling at this stage will worsen the problem.

We recommend oil suitable for outdoor bamboo furniture including fungicide. Fungicide is an anti-fungal agent.

For daily cleaning is recommended only hot water, as soapy water dissolves the oil.

Outside the season, store in a dry and ventilated room. Do not cover the bamboo top, as bamboo is a natural material that needs air to avoid that fungi and mold will spread into the material.

The stone is pre-treated with oil and will get lighter in color with time. To keep the dark color stone oil can be applied.

## **CLICK PLASTIC LAMELLAS**

For cleaning please use a wet cloth or a soft brush. If necessary, dish soap can be added to the cleaning water. Do not use any kind of chemicals for cleaning.

## **POWDER COATED METAL PARTS**

For cleaning please use a wet cloth or a soft brush. Do not use any kind of chemicals for cleaning.
